

Executive

9 September 1949

Assistant General Counsel

Bureau of the Budget Bulletin No. 50-5

1. Bulletin No. 50-5 from the Bureau of the Budget dated 31 August 1949, cites Section 86 of the 1951 Call for Estimates requesting submission in connection with these estimates of a preliminary legislative program.

2. It is not contemplated that CIA will propose any legislation during the Second Session of the 81st Congress, its needs having been fulfilled by the passage of Public Law 110 in the First Session.

3. CIA comments have been informally requested as to any changes desired to be included by the House Armed Services Committee in the recodification of the National Security Act and its amendments in the coming Session. We have stated that we do not desire any changes in Section 102, Public Law 253, 80th Congress, which sets forth CIA's functions, and have informally concurred in the elimination of Section 102(f) from Public Law 253, as it is no longer applicable, and was included merely for the purposes of the transfer of the Central Intelligence Group to the Central Intelligence Agency.
